COMPANY HISTORY

Axel Industries has experienced splendiferous growth since its inception in the year 1999. The company was founded by Mr. Rajender Gupta (Director), whose efforts has touch the horizons of success and have established a renowned position in the manufacturing and supply industry by delivering high quality products at competitive prices. With a history of over Decades, Axel India is now serving thousands of customers in India and around the world. In 2017 Mr. Rajender Gupta have incorporated new company as M/s Axel India and have come up with the modern state-of-the-art technology with a new brand name **TRIXEL**. For the very first time in India, Axel India is coming up with the manufacturing of Nylon fastener which will be going to compete with the renowned International brands of the world.

VISION

We are today one of the leading manufacturers in India with a client base that extends across India, USA, Europe and the rest of the world. We constantly strive to stay one step ahead in development. Our entire staff is dedicated to the pursuit of quality.

MANUFACTURING

Our manufacturing facility is located at Siraspur, Delhi. The plant is fully equipped with modern techniques and state-of-the-art equipment.

COMPANY PROFILE

Axel India, a firm certified for quality management system, under ISO 9001:2015 & one of the leading, growing professionally managed organization, specialized in manufacturing and marketing of varieties of Mechanical Anchors, Nylon Anchor, Chemical Anchor & Stone Cladding Clamps for Dry Cladding & Wet Cladding and alike fixings to suit the needs of most demanding construction market. Axel India also specialize in customized products as per customer requirements.

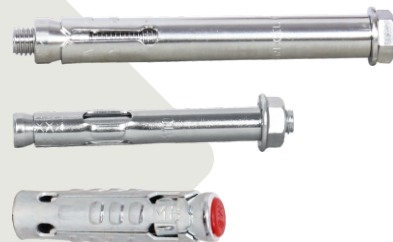

Some of the uses are:

- It fixes the base material more effectively and fastened it firmly, while fixing for Concrete, Solid Brick, Concrete Block, Hard Natural Stone or any other hard media etc.
- All Axel India products, a many of which are industry oriented standards and are compatible with other similar units of International level & brand, which are manufacturing the same type of goods in Glasgow, using some of the most advance technical facilities in the production industry.

“ We commit ourselves to R & D, and innovation and bypass status with active attitude agitated mind, expecting to lead in the world ”

OUR SERVICES

At Axel India, we are committed to making it easy for you to contact us. After having a one phone call, you will be connected to one of our highly trained professional customer service representative, who in turn will immediately respond to your queries and come out with suggestive measures. At Axel India, we are committed to build relationship that last for years together.

“ We persist in with stable quality & advanced technology to meet customer demands ”

OUR PRODUCTS

At present, we are supplying the Mechanical Anchors and Stone Cladding Clamps for number of important projects through various National/International organizations & companies of repute working in India including Delhi Metro Rail Corporation Ltd.

MECHANICAL ANCHORS

We are engaged in offering superior quality Mechanical Anchors to our valued clients. which are used in diverse industries. Manufactured using top grades of stainless steel and other material with latest technology. These Mechanical Anchors are very economical through-fixing installation.

STONE CLADDING CLAMPS

Backed by our rich industry experience and advanced manufacturing unit, we are offering a wide collection of Stone Cladding Clamp that are widely used for pipe fittings in engineering, electronic, automobile and construction industry. Compact design, corrosion resistance, durability and high tensile strength are some of the features of this clamp that are highly appreciated among the clients.

CHEMICAL ANCHORS

Backed by a team of experienced professionals, we are offering an extensive range of Chemical Anchor that is used in the application and insertion of chemicals at different phases of construction.

OUR NEW PRODUCTS

NYLON ANCHOR

Light-duty anchor for mechanical, electrical and interior finishing fastenings in materials such as drywall, gas concrete and masonry.

MATERIAL

Anchor made of polyamide(Nylon 6)

FEATURES

- Ideal anchor for a huge range of applications in hollow and solid base material.
- Pre-assembled for optimum handling and fastening quality.
- Available in several sizes, head configurations and materials for a wide range of applications.
- High bending strength, long life & high load bearing capacity due to Nylon material.

BASE MATERIAL

- Reinforced concrete
- Hard natural stone
- Solid bricks
- Hollow/cavity brick masonry
- Sand-lime bricks

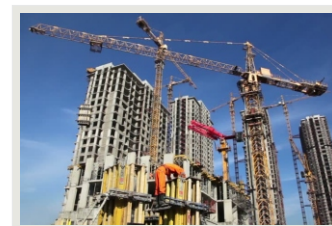

APPLICATIONS

- Cladding metal frames/structures.
- Fastening of door and window frames , railings, balustrades.
- Fastening metal substructures for ventilated facades.
- Interior Furnishing.

- Axel India Pullout testing equipment for Anchor.
- Tested & validated by Shriram Institute for Industrial Research in accordance with BSEN 837-1.

SEGMENT BOLT FOR TUNNEL

LIGHTNING ARRESTOR
AIR TERMINATION

PRODUCT RANGE

ANCHOR FASTENERS are made of Stainless Steel 304 Grade (A-2), 316 Grads (A-4) & Galvanizes Steel Grade 4.6 & 5.8, high tensile Grade 8.8 & 10.9.
